🔗 Portfolio

Profile

Full Stack Developer with a business administration background, skilled at building full-cycle web applications from concept to deployment. Combines expertise in the **TypeScript/Node.js/React/PostgreSQL** stack with a strong product mindset to deliver efficient, scalable solutions. Proven ability to enhance performance, streamline development workflows, and contribute to team success in agile environments.

Professional Experience

02/2025 – 06/2025
Remote

Full Stack Developer Intern | Bewide Technology
- Engineered full-stack features for SaaS apps using React, TypeScript, and Node.js, contributing to 15% faster page loads through optimized data-fetching.
- Containerized dev environments with Docker, standardizing setups and reducing onboarding time by 25%.
- Collaborated in an Agile team using Jira, delivering 3 major features ahead of schedule.
- Conducted code reviews and improved documentation, enhancing team knowledge sharing.

06/2025 – 09/2025
AyerTena, Addis Ababa

Web Development Trainer | Meweda School
- Designed and delivered a 10-week curriculum (HTML, CSS, JavaScript) to 40+ students, achieving 95% completion rate.
- Translated complex concepts into accessible, project-based lessons, boosting student engagement.

Skill

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

- **Databases:** PostgreSQL, MongoDB, MySQL, Firebase, Prisma

- **Frontend:** React, Next.js, Redux, Tailwind CSS, Shadcn/ui, React Native

- **Tools:** Git, Docker, AWS (S3, Lambda), CI/CD, Jest, Cypress, Postman, Linux

- **Backend:** Node.js, Express.js, REST APIs, GraphQL, tRPC, Socket.io ⧉

- **Methodologies:** Agile/Scrum, Systems Analysis, SDLC

Projects

Assunah Foundation Platform | Live, *Next.js • TypeScript • PostgreSQL • Prisma • Docker • tRPC* ⧉
- Full-stack platform supporting 500+ monthly users for NGO.
- Optimized PostgreSQL schema, improving query performance by 40%.
- Implemented JWT authentication & RBAC; built type-safe tRPC API.

JobTracker | GitHub, *Node.js • React • PostgreSQL • Docker* ⧉
- Full-stack job application tracker with auth and dashboard.
- Achieved 85% test coverage with Jest & React Testing Library.
- Configured GitHub Actions CI/CD pipeline.

Agri Data Dashboard | [Live], *Python • React • TypeScript • Chart.js* ⬈
- Built Python backend with REST API for agricultural data processing.
- Created interactive React frontend with complex filtering and **Chart.js visualizations**.
- Added CSV/PDF export for offline reporting.

Education

09/2021 – 06/2025
Addis Ababa, Ethiopia

Bachelor of Business Administration and Information System,
Addis Ababa University-School of commerce
- Foundation in Information Systems, Database Management, and business processes.
- Relevant Coursework: Database Systems, Web Development, SDLC and Systems Analysis.

Certificates

- **Full Stack Web Development (MERN) Program** | Evangadi Tech Academy

- **ALX Software Engineering** | Holberton School / ALX

- **JavaScript Algorithms and Data Structures** | freeCodeCamp
